Apps on the iPad

Internet

Before…The Internet
Now…Web 2.0

- "Read Only" now becomes
  "Read, Write, Collaborate, Share/Publish" content

- Tweet it. Blog it. Comment on others' sites.

- You become an author by posting!

This means…

- What you produce and what you post matters . . .

A LOT!

- It becomes public information -- to the world

- You have a huge responsibility in two major ways
  - Content
  - Privacy

Think About Privacy

What do you do on social media websites (e.g.Facebook)?

- Share photos?...With whom?
- Post on your wall...Who can read them?
- Play games/use apps?...Who's following you?

Think About Privacy

- Metadata… it never goes away!!
  Think before you post!

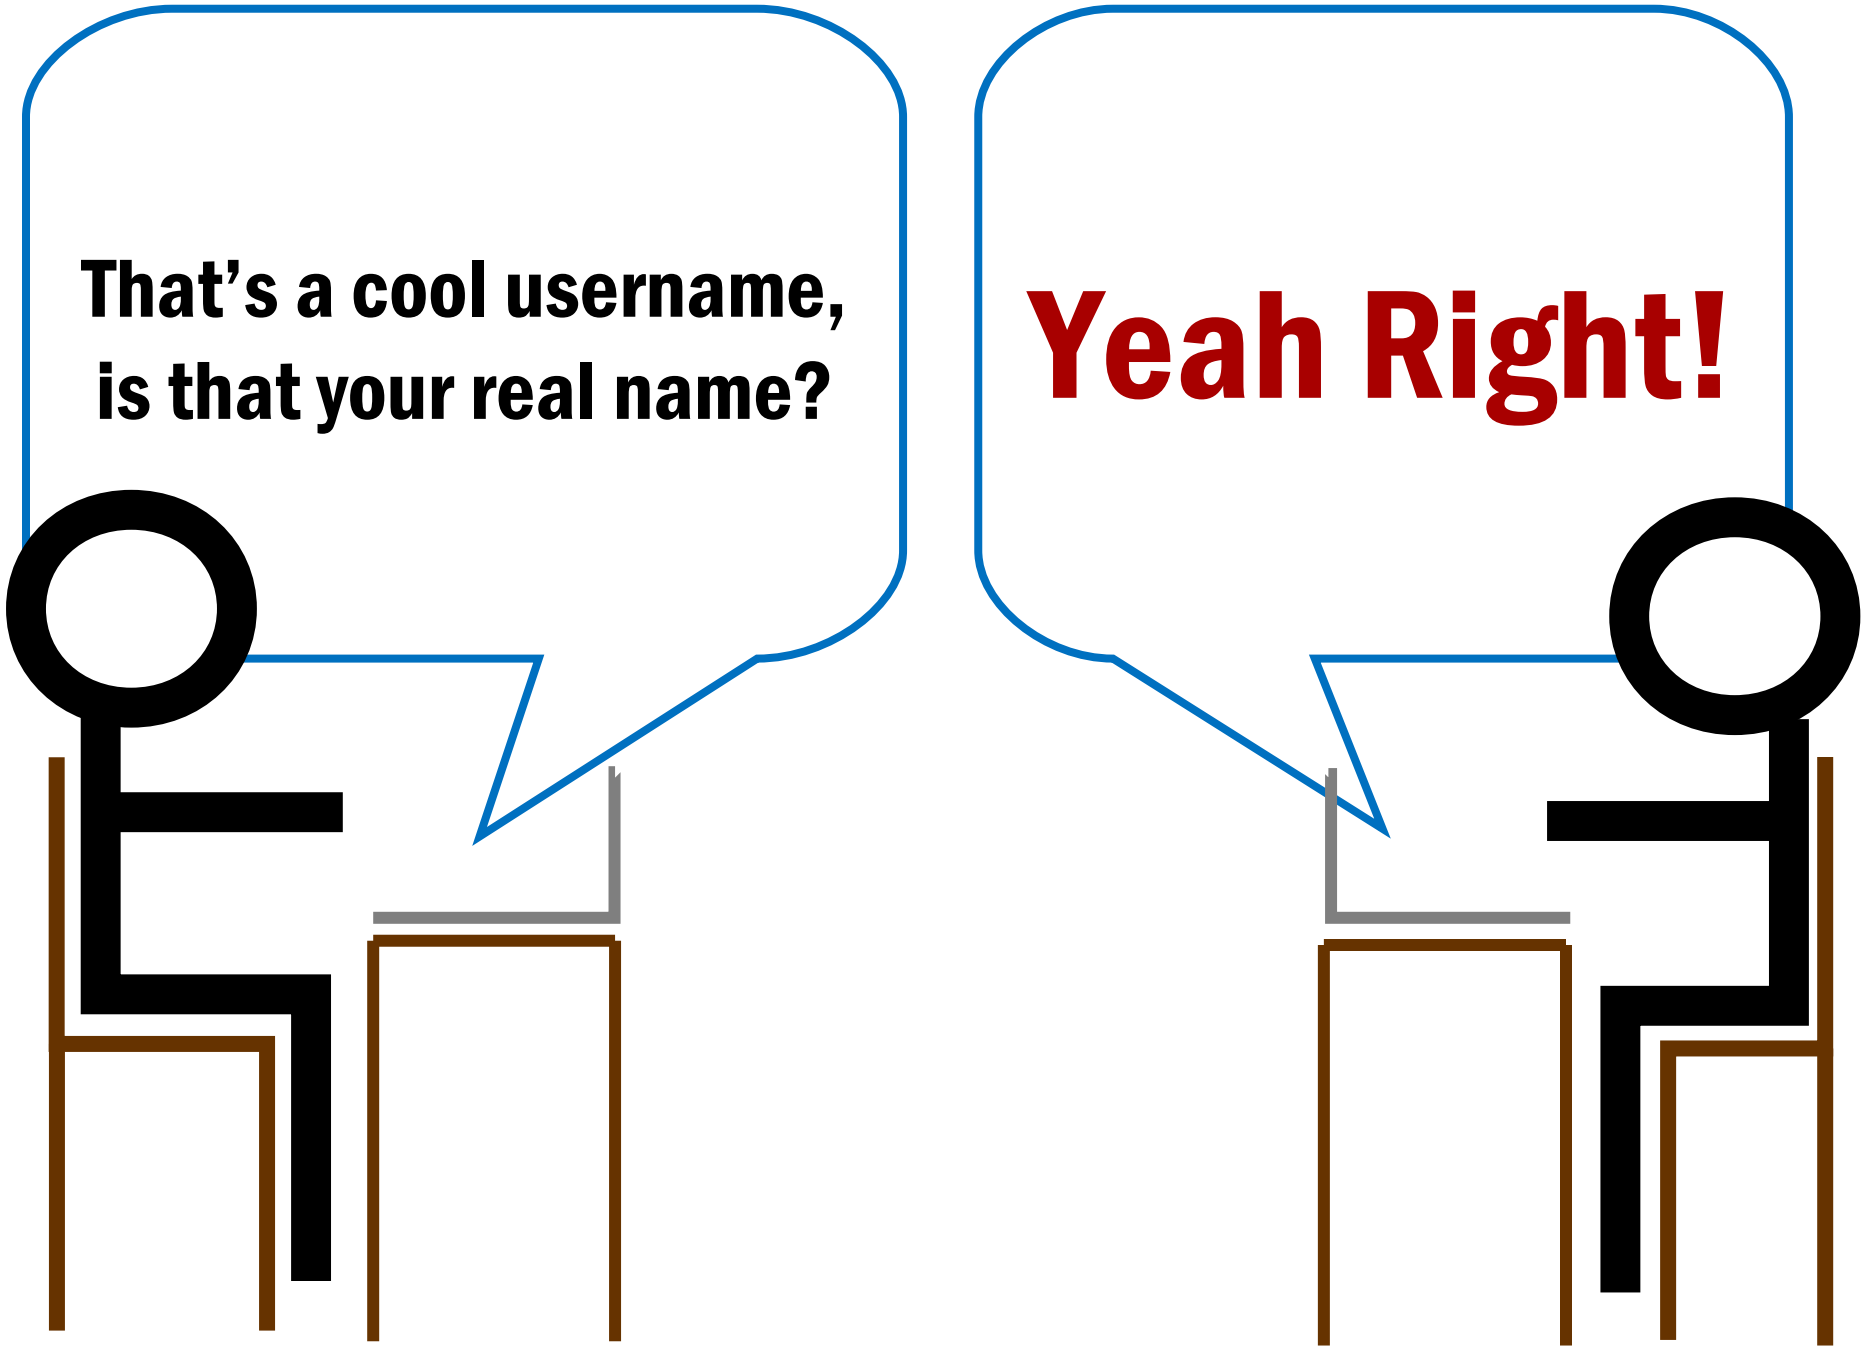
- Everything spreads beyond your circle of friends

- http://www.youtube.com/watch?v=SGIrAhtQC24

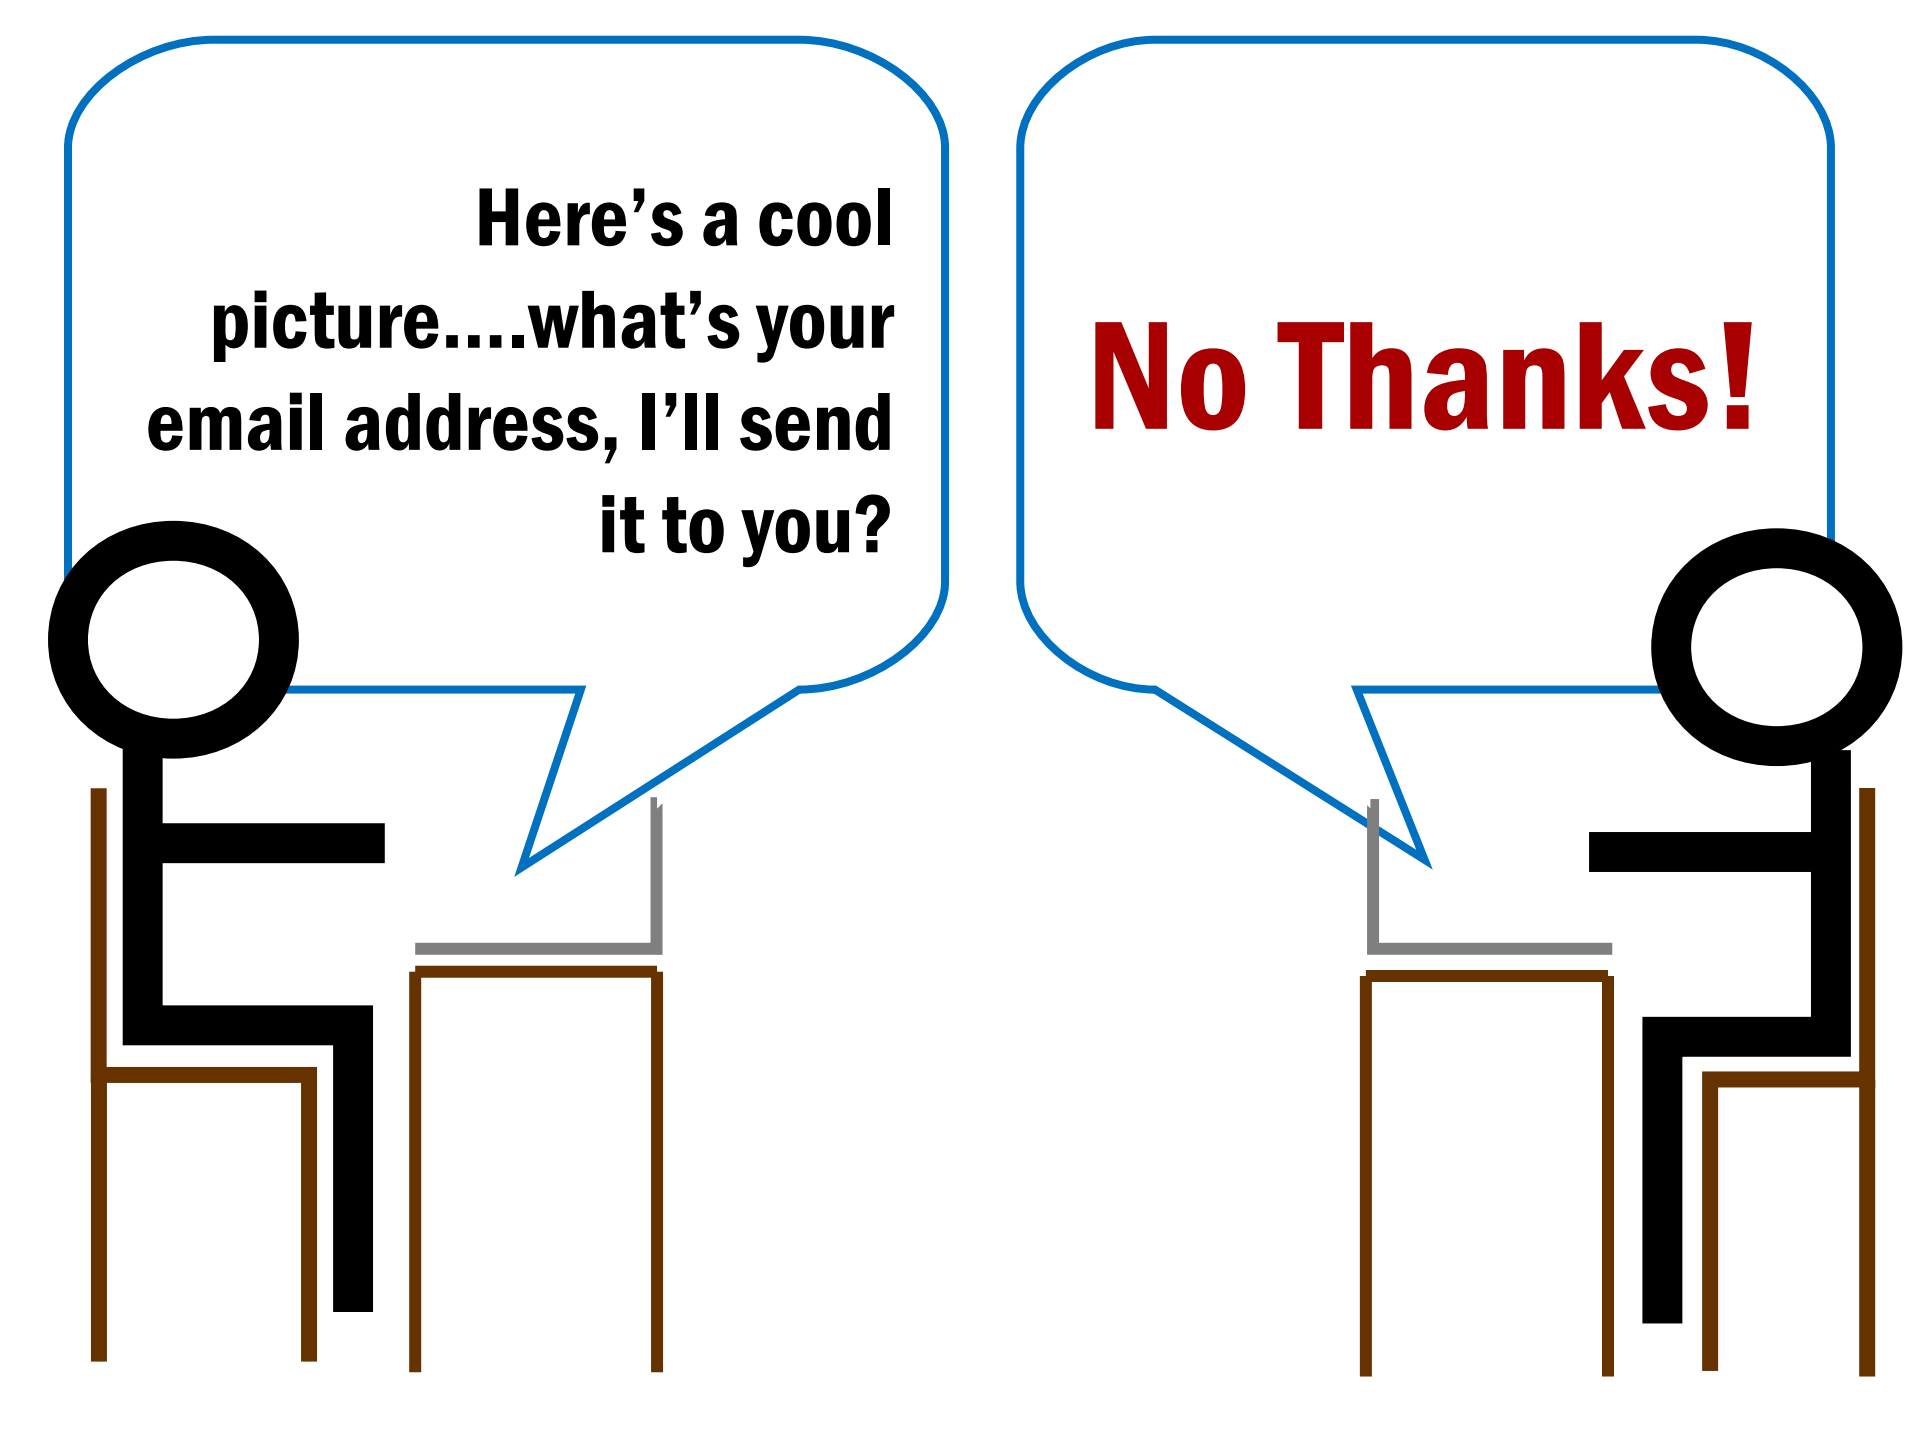
- Protect yourself. Protect others.

So…

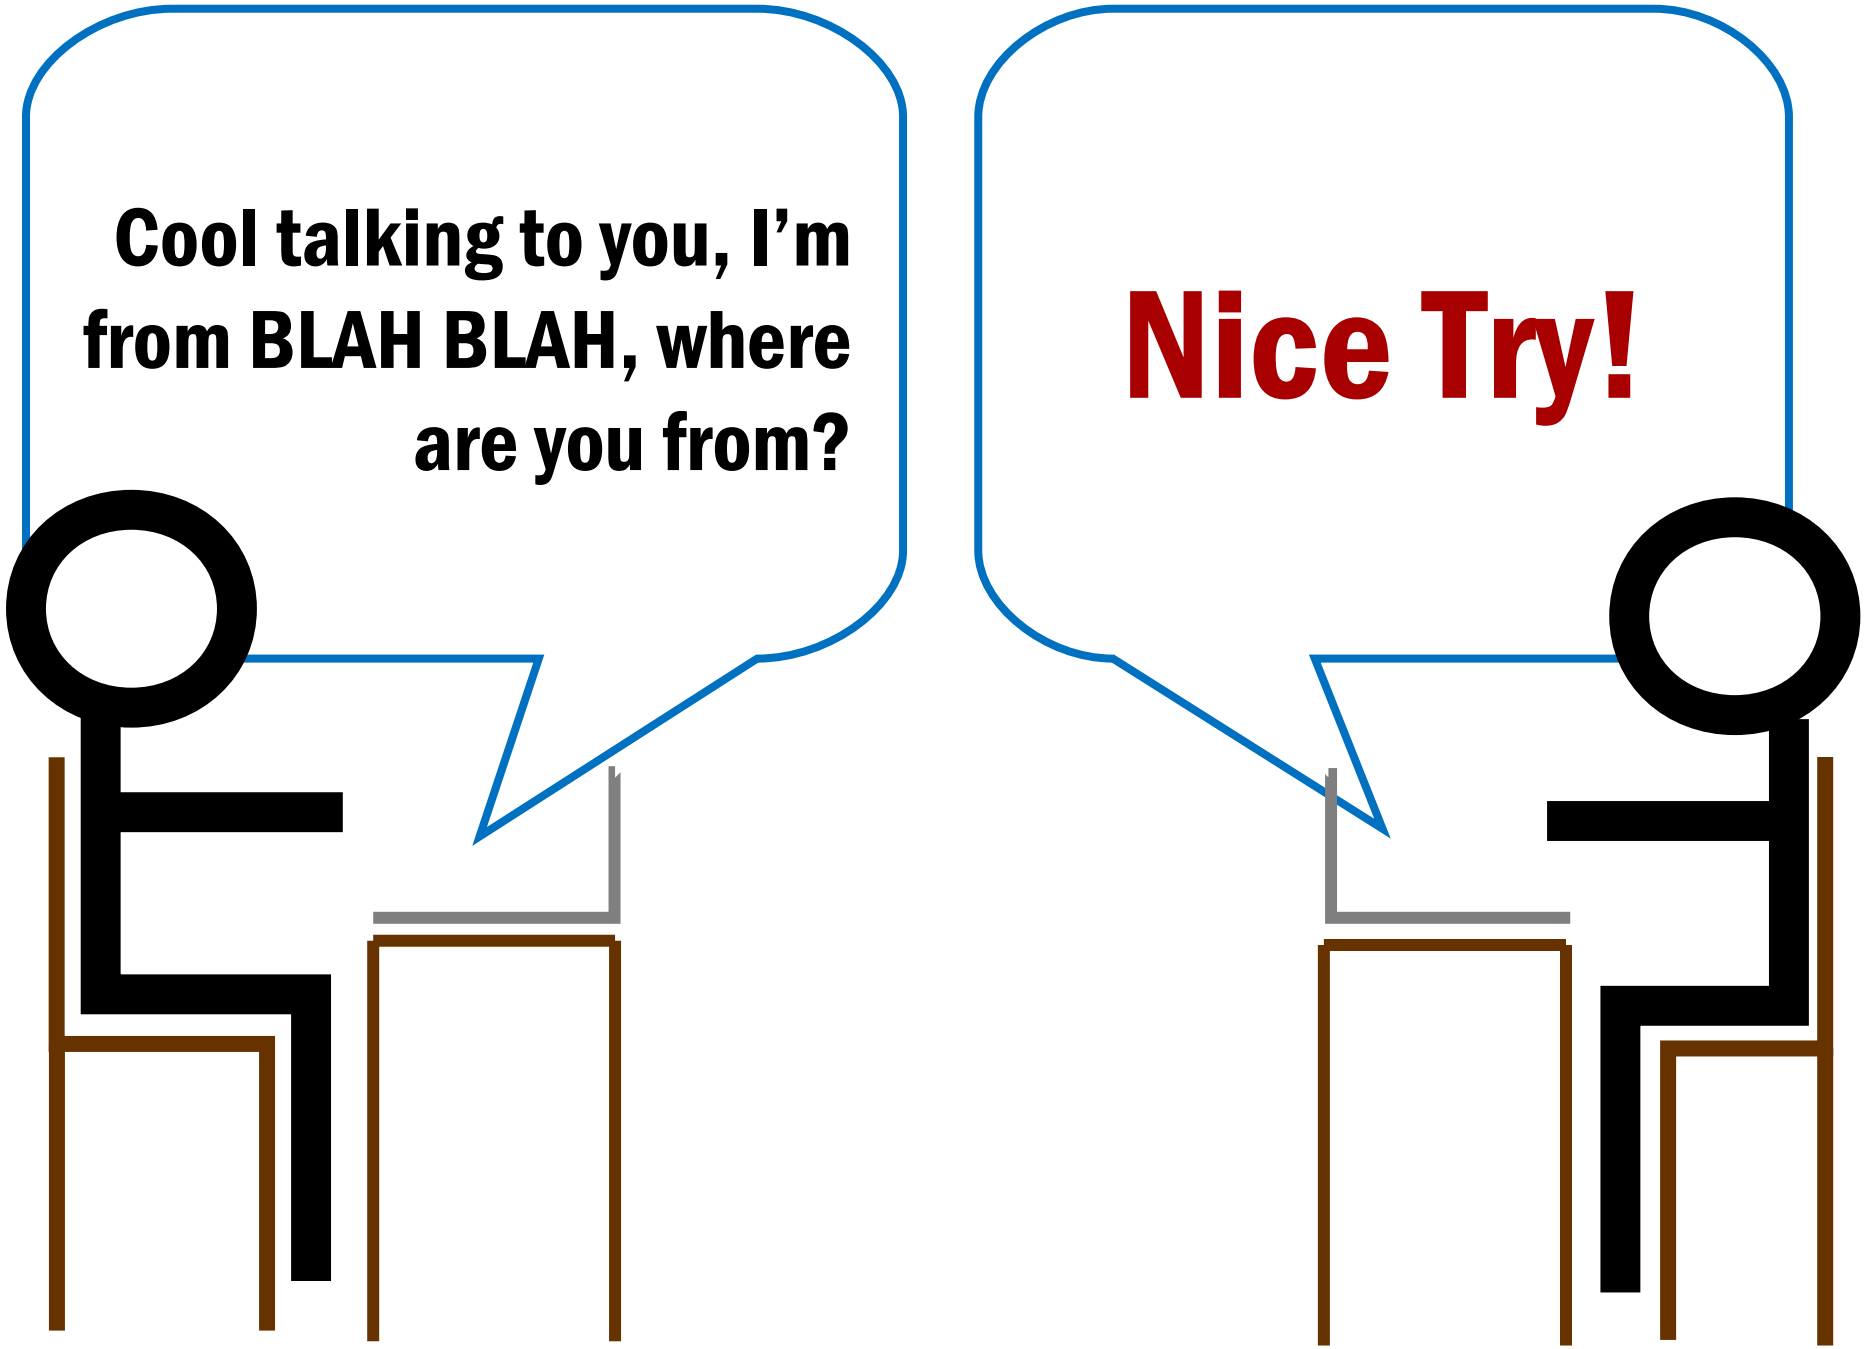
1. No real names
2. No telling what school you are from
3. No telling where you live
4. No giving out your email address
5. No giving out your phone number



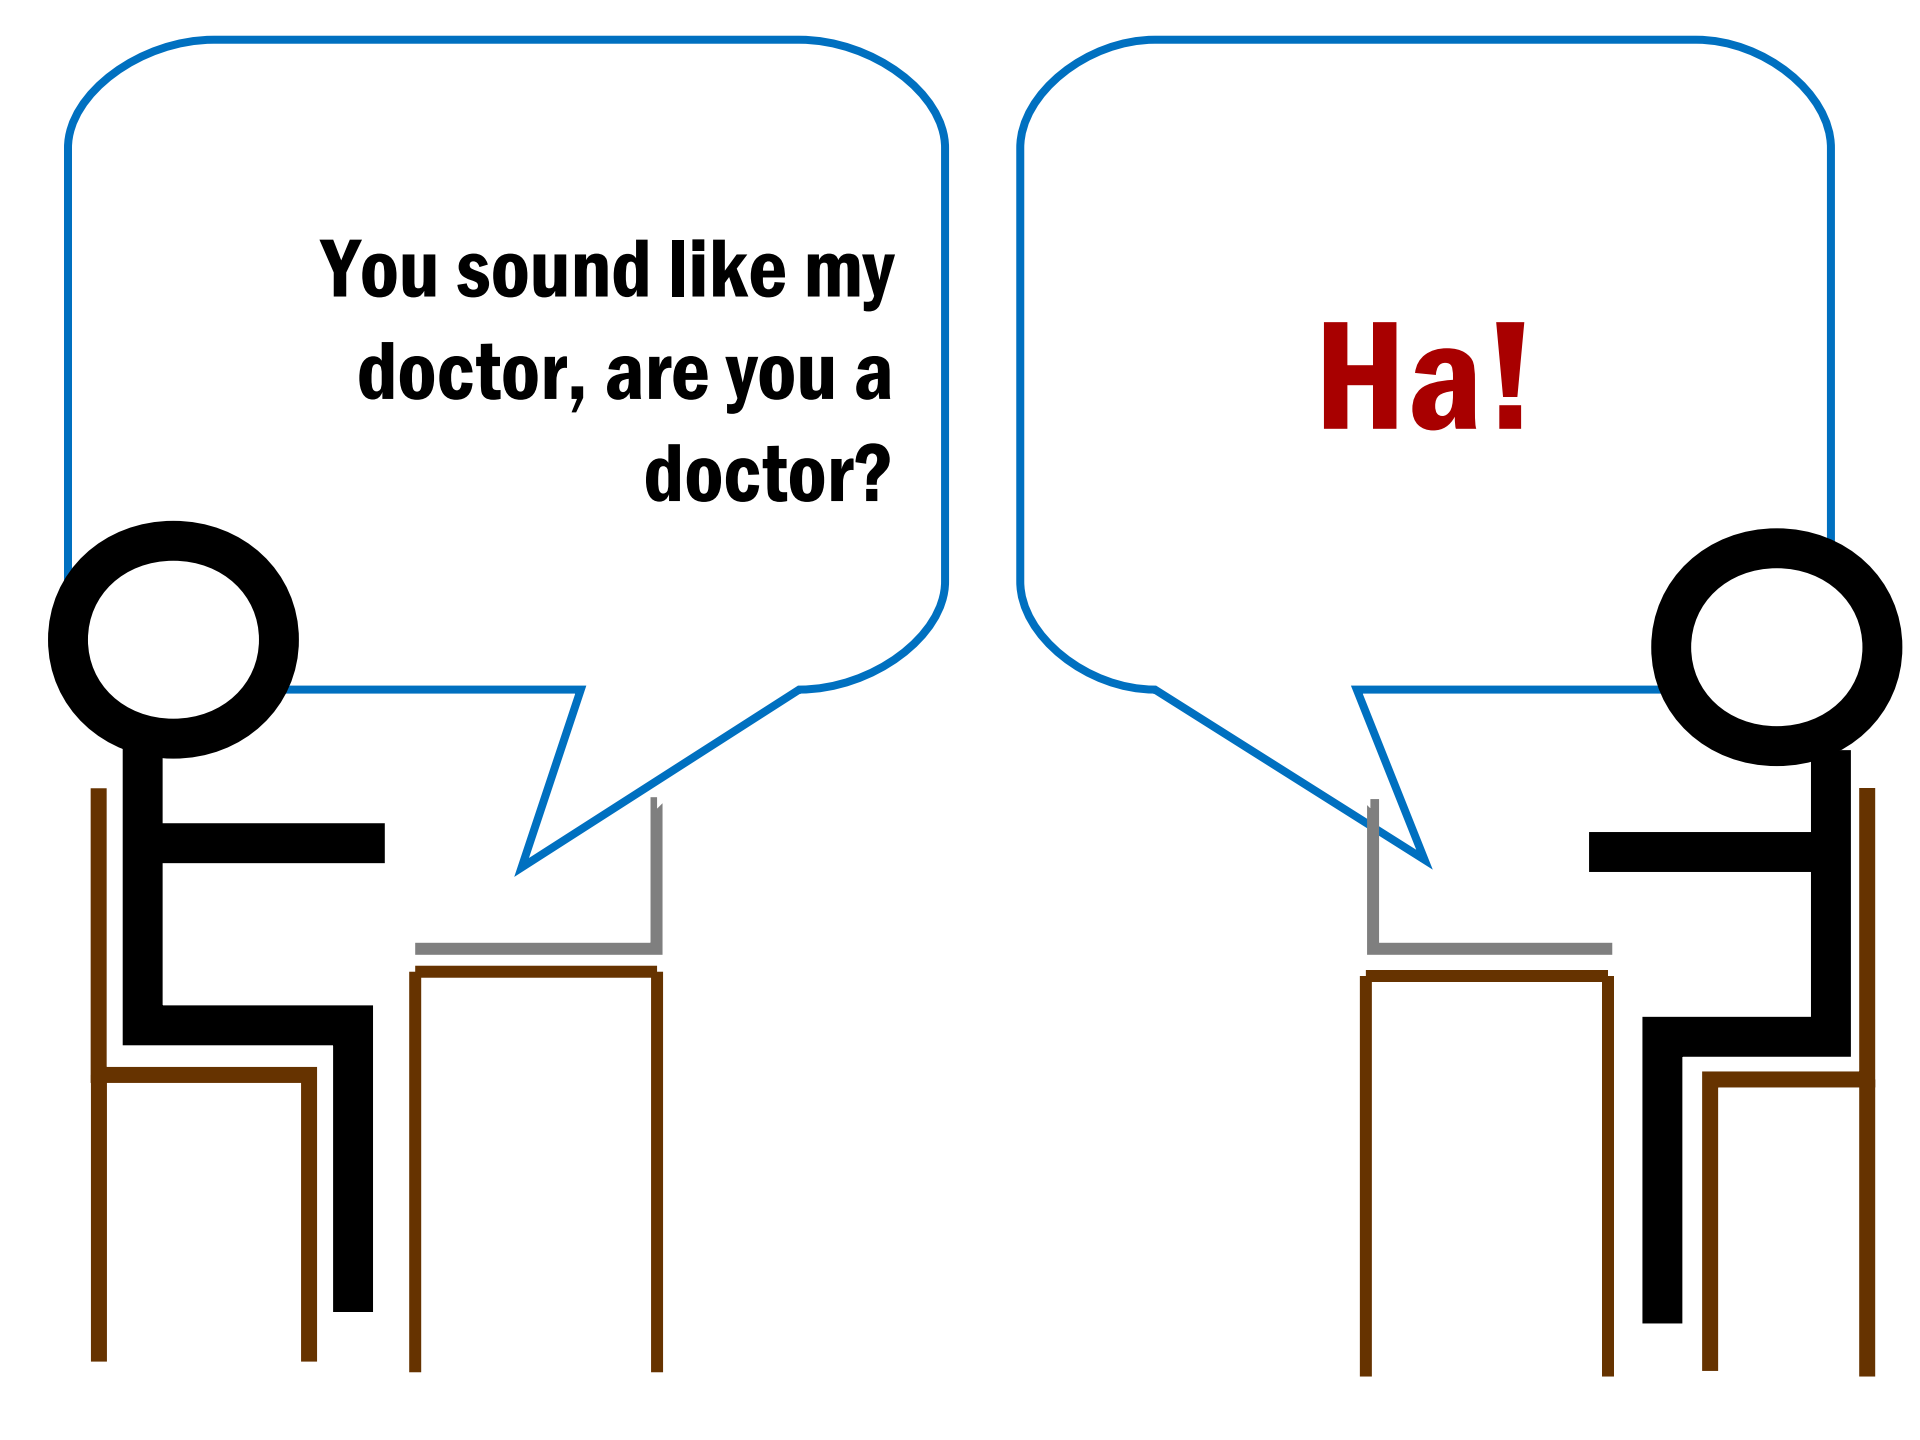
That's a cool username, is that your real name?
Yeah Right!



Here's a cool picture....what's your email address, I'll send it to you?
No Thanks!



Cool talking to you, I'm from BLAH BLAH, where are you from?
Nice Try!



You sound like my doctor, are you a doctor?
Ha!

Think About Content

You Have a Responsibility to:

- Be accurate
- Be smart
- Educate others
- Use your manners

Because:

Everything is public … you are representing yourself to the world!

So…

What to do on social media websites:

- Share photos?…**Create private albums**
- Post on your wall… **Share only with friends**
- Play games/use apps?…**Ask if they are okay**

The iPad Oath

- Promise to ask permission to use the iPad
- Promise to ask permission to use the internet
- Promise to only visit websites my teacher has given permission to visit
- Always ask permission to have an app installed
- Promise to always tell my teacher if something goes wrong with the iPad

Shaughnessy Elementary School

NO:

- Malicious intent to change/break the iPad infrastructure
- Inappropriate use of applications/services
- Inappropriate behaviour (cyber-bullying)

IF YOU PURPOSELY DID IT, PRIVILEGES WILL BE TAKEN AWAY

YES:

- Use the iPad
- Try to explore new things
- Create projects

EVEN IF YOU DO SOMETHING WRONG, WE CAN FIX IT!!

For Interactive Learning Opportunities . . .

- Privacy Playground (ages 8 to 10)
