

Information

We are a non-profit society committed to helping you maintain and improve your health. Because good health involves many factors, we provide a range of services in one building that emphasize health education and illness prevention.

More Information

Healthy Kids Program: Dependent children under 19 years of age, in families approved for premium assistance by the Medical Services Plan (MSP) through the Ministry of Health, are automatically registered with the Healthy Kids Program. Children are eligible for \$2000 of basic dental services every two years.

Children with Special Needs

We will provide a successful local model, initiated at BC's Children Hospital. We believe that we can provide routine hygiene and dental care while educationing and teaching opportunities in a safe and calming environment. Dental patients who have an ASD diagnosis do not differ from other patients as far as their dental presentations and problems. It is possible to achieve the best oral health outcomes possible.

Jeannie Villanueva, Dental Clinical Coordinator, Operations

With 25 years experience in business management, human resources, customer service and communication, Jeannie has created positive change in many realms; from the education system to the dental and medical fields to creating one of the largest community centres in British Columbia. Her exceptional leadership approach emphasizing teamwork, alignment, structure, efficiencies, systems and processes creates an exceptional office culture where team members "give their best every day."

Story

This Pediatric Clinic has been a 4 year project. It all started when Jeannie Villanueva and Kayla Ragosin-Miller had a vision to support special needs Children in their Adolescent years, but more importantly to continue to support them once they become adults. Jeannie and Kayla see the importance of consistency and familiar places and faces.

Kayla Ragosin Miller RDH, PID

Kayla Ragosin-Miller is a dental hygiene graduate from the University of Manitoba. As the hygienist at BC Children's Hospital she is currently involved in the research and development of helping children on the Autism spectrum accept dental treatment in the dental office without the use of general anesthetic. 10 years ago she developed the Dental Intervention Program for children with Autism and related disorders, this program has been highly successful landing her the nickname "The Autism Lady of Dentistry". In 2011 she was recognized by Johnson and Johnson with a Dental Hygiene Superhero award for her dedication working with this clientele and in 2016 she was awarded the The Dental Hygienist Making a Difference award from BCDHA. She is also a part time instructor and works in private practice
