Parent Resources for Supporting children and Youth with Digital Safety

<https://saferschoolstogether.com/news-events/raising-digitally-responsible-youth-a-parents-guide/>

“Our current world climate is constantly connected to technology. What do we need to know as parents to protect our children and teach them responsible and appropriate uses of technology? The answer is that the parameters of rules and expectations we put in place at home will undoubtedly guide our children’s sense of digital responsibility.

Raising children in a digital era can seem overwhelming at times. Technology has entered our lives at a rapid pace over the past several years and continues to evolve. The reality of this is that apps and technological devices will change, but the behavior stays the same. Moderation is key to managing technology use in our homes. The aforementioned does not need to be an “all or nothing” approach with absolute prohibition or full unchecked usage.

This Parent’s Guide to Raising Digitally Responsible Youth will equip you with the knowledge you need to stay in the loop about the most popular applications and trends. Correspondingly, this guide will give you a better understanding of your child or teen’s internet usage so you can relate to the digital world they live in.”
