

Foods 8 – students learn kitchen fundamentals and nutrition principles. Best of all, they cook and eat what they make such as chocolate chip oatmeal cookies, coffee cake, chili lime fries,

scrambled egg burritos, pasta primavera, apple cobbler, taco salad, and pizza. Students cook in small groups in a mini kitchen. Check out

Wood Working / Metal Work

Woodwork/Metal Work – We make stuff!!!

Students will learn to make various kitchen utensils and wooden boxes. Projects changes from year to year.

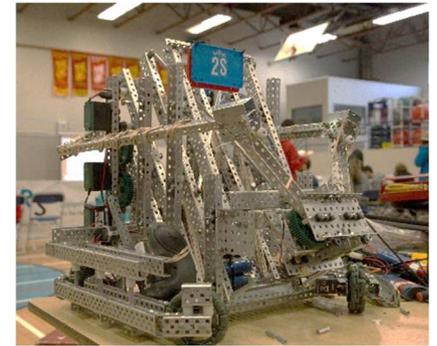

• If you have friends and family that's been through our woodworking and metal working programs, then you know what we are talking about.

Robotics – We build Robots!

Be part of the fun and excitement!!

All Grade 8 students get a chance to be part of our Gr 8 Robotics Teams. We compete all over the city and around the province. Monthly robotics challenges/events.

Graphics and Photography 8

In Graphics you will learn Photoshop software and the basics of becoming a

graphic designer. You'll also learn about marketing and business. Projects vary but can include a coffee mug, keychain, ID tag and candy package.

In Photography you will learn how to create great photos using digital cameras and image editing software.

If you find any of these courses exciting or valuable, we have many senior courses that may interest you.
