#### Student Learning Survey:

The Student Learning Survey (SLS) provides feedback on the implementation of the curriculum changes, learning environment, student wellness and satisfaction, student belonging and engagement, and career preparation. The SLS is the only source of province-wide information about students' learning experiences through the perspectives of students, parents, guardians/caregivers, and school staff. Schools and districts use the SLS to make informed decisions around long-term planning and goal-setting, and in providing individual students personalized support.
